starting point:	Gaisberglift Bergstation
-----------------	--------------------------

destination point:	Gaisberglift Talstation
--------------------	-------------------------

best season:	MAY, JUN, JUL, AUG, SEP, OCT
--------------	------------------------------

Altitude profile

## Description

The "Gaisberg Trail" is more demanding compared to the "Lisi Osl Trail", which is also on the Gaisberg mountain. The 2.3 km long trail meanders along the lift trail. Then you cross the steep slope where you ride along the edge of the ski slope until the finish. The technically challenging trail has some jumps and drops for downhill riders. For the rookies there are chickenways as an alternative.
